*FOR ALL CLASSES OF BEEF AND DAIRY CATTLE*

**PRODUCT DESCRIPTION:**

A companion product to Bio-Pro Bovine Paste. While the paste serves as a concentrated initial inoculation of bovine-specific lactic bacteria, live cell yeast, egg-source immune factors, and vitamin E, Bio-Pro Calf Powder is intended for a very economical, long term benefit to calves.

**KEY BENEFITS:**

Extremely useful in replenishing or re-establishing desirable microflora in cattle during and following stressful conditions.

**DIRECTIONS FOR USE:**

Recommended for use during the first three to six weeks.

**BABY CALVES:** Bio-Pro Calf Powder is to be added to whole milk, milk replacer, water, or dry feed at 10 grams per head daily for the first five (5) days of life and then two (2) grams per head daily thereafter until weaning.

**STORAGE RECOMMENDATION:**

Store in a cool dry location.

**AVAILABLE SIZES:**

55lb box

500g foil
