FOR ALL CLASSES OF SWINE

PRODUCT DESCRIPTION:

A source of live, selected host-specific lactic bacteria for all classes of swine.

KEY BENEFITS:

- Appetite enhancer
- Provides highly effective immune stimulation
- Helps prevent tissue oxidation
- Replenishing supplement

DIRECTIONS FOR USE:

The most beneficial times to use Bio-Pro Swine Powder are:

BABY PIGS: Use 0.5 grams of Bio-Pro Swine Powder per head daily as soon as pigs begin consuming water. At weaning, use 1 gram per head daily (short term) and ¼ gram per head daily thereafter (long term). Any time bacterial replenishment would be needed such as follow-up periods of stress or use of strong oral antibiotics, use at the rate of 1 gram per head daily.

GROWING PIGS: Use daily supplementation at the long term rate of ¼ gram per head daily. 3-5cc of Bio-Pro Swine Powder any time bacterial replenishment would be needed (such as follow-up after periods of stress, moving of barns, or use of strong oral antibiotics).

SOWS: Begin use of Bio-Pro Swine Powder in drinking water, at the rate of ½ to 1 gram per head daily, 2 weeks pre-farrowing and continue for 2 weeks post-farrowing to help offset stresses during this time. Bio-Pro Swine Powder may be added to the feed instead, if desired.

STORAGE RECOMMENDATION:

Store in a cool, dry location.

AVAILABLE SIZES:

50g foil package
