FOR ALL CLASSES OF BEEF AND DAIRY CATTLE

PRODUCT DESCRIPTION:

A unique companion to Bio-Pro Calf Powder, which serves as a highly concentrated source of selected host-specific strains of beneficial bacteria, live cell yeast, egg-source immune factors and vitamin E. Bio-Pro Bovine Paste serves as the cornerstone of our calf program which is a proven and highly acclaimed All-Natural approach to successfully rearing calves.

KEY BENEFITS:

Highly effective All-Natural treatment for:

- Scours, digestive upsets, off-feed, and more
- Enhancing appetite
- Stimulating immune system
- Preventing tissue oxidation
- Replenishing supplementation

DIRECTIONS FOR USE:

DAIRY CATTLE: 10cc of Bio-Pro Bovine Paste on day 21 prior to calving, 10cc on the day of calving, and 10cc again on day 3 and day 7 post-calving.
For best results, add Bio-Pro Bovine DFM or Matrix to the cow's ration during the 21 days prior to calving and the 21 days after calving. For treatment in cattle experiencing off-feed or digestive upsets, administer 10cc of Bio-Pro Bovine Paste for 3 consecutive days.

BABY CALVES: 5-10cc of Bio-Pro Bovine Paste at birth and again at weaning.

For best results, combine with Bio-Pro Calf Powder in the milk or milk replacer, and Bio-Pro Bovine DFM or Matrix in the starter ration. For treatment in calves with scours or digestive upsets, administer 10cc of Bio-Pro Bovine Paste for 3 consecutive days.

BEEF CATTLE: 10cc of Bio-Pro Bovine Paste during or following shipping, worming, weaning, vaccination, sickness, pre-conditioning for the feedlot ration or climate changes.
For extended benefits, add Bio-Pro Bovine DFM or Matrix to the ration for approximately 30-45 days after the administration of paste and in the final 60 days of the finishing period. For treatment in cattle experiencing off-feed or digestive upsets, administer 10cc of Bio-Pro Bovine Paste for 3 consecutive days.

STORAGE RECOMMENDATION:

Store in a cool dry location.

AVAILABLE SIZES:

60cc and 300cc tubes
