FOR ALL CLASSES OF BEEF AND DAIRY CATTLE

PRODUCT DESCRIPTION:

The most complete, species-specific direct fed microbial available to beef and dairy producers.

KEY BENEFITS:

Bio-Pro is a species-specific product that aids in

- Increasing activity
- More efficient utilization
- Assists in energy metabolism
- Supplementation during stress
- Extremely useful in replenishing or re-establishing desirable microflora in cattle during and following stressful conditions.

Bio-Pro contains *Aspergillus oryzae* (AO) which serves as a source of starch digesting enzymes. AO has been shown to improve nutrient utilization, milk production and growth rates while also reducing body temperature in the heat-stressed cattle.

DIRECTIONS FOR USE:

The most beneficial times to use Bio-Pro Bovine DFM are:

BABY CALVES: Daily Supplementation in the feed (1/2 oz per head daily) combined with the use of Bio-Pro Bovine Paste on the first day of life and again at weaning.

DAIRY COWS: Daily Supplementation in the feed (1 to 2 oz per head daily) during the close-up dry cow period and early lactation. Daily supplementation throughout lactation may be warranted in certain feeding programs and during adverse environmental conditions.

BEEF CATTLE: Daily Supplementation in the feed (1 to 2 oz per head daily) while pre-conditioning cattle for the feedlot. Daily supplementation throughout the feeding period may be beneficial in certain instances such as adverse environmental conditions and during the finishing period to aid in shedding harmful bacteria prior to slaughter.

STORAGE RECOMMENDATION:

Store in a cool dry location.

AVAILABLE SIZES:

55lb box

500g foil
