FOR NEWBORN BEEF AND DAIRY CALVES

PRODUCT DESCRIPTION:

Designed to provide protection and immune stimulation to newborn calves who have limited or no access to good quality maternal colostrum. Designed to serve as a high quality colostrum supplement for newborn calves who have limited or no access to good quality maternal colostrum during the first 24 hours of life.

KEY BENEFITS:

- Immediate and high impact on challenged calves
- Provides highly effective immune stimulation
- Useful in establishing desirable microflora

DIRECTIONS FOR USE:

Recommended for use during the first 24 hours after birth.
The most beneficial times to use Bio-Pro Head Start are:

BABY CALVES: Mix the entire contents of the package into 1&1/2 quarts of warm water or milk replacer. Administer by bottle, nipple pail, or esophageal feeder as soon as possible after birth. Ensure that the treated calf consumes the entire contents.

STORAGE RECOMMENDATION:

Store in a cool (no higher than room temperature or 72°F or 23°C), dry location and out of direct sunlight.

AVAILABLE SIZES:

55lb Box
1lb Foil
