FOR POSTPARTUM COWS

PRODUCT DESCRIPTION:

Designed to use in postpartum cows for the prevention and treatment of ketosis, milk fever, dehydration, and other related disorders. Ensures a smooth transition for cows by minimizing calving problems and maximizing start-up milk yield.

KEY BENEFITS:

In addition to providing the same benefits as PowerPunch such as:

- A high concentration of readily available energy
- Accelerating appetite, feed intake, and start-up milk yield
- Bolstering immunity during periods of transitional stress

PowerPunch Plus *also* provides:

- Highly available calcium sources at a combined level of 10%
- Proven electrolytes to help prevent dehydration in cows after calving.

DIRECTIONS FOR USE:

Thoroughly mix PowerPunch Plus with water prior to oral administration as follows:

POST-CALVING: 2lb. (32oz.) with 5 gallons water immediately after calving.
Repeat again 6-12 hours later or as needed.

*These are approximate levels of water as higher levels may be needed for adequate hydration of the animal during periods of stress. One level scoop contains 5oz. of product.

STORAGE RECOMMENDATION:

Store in a cool location.

AVAILABLE SIZES:

25lb Bucket (400 oz.)

10lb Bucket (160 oz.)
