PROTOCOL[®]

RESTORE

Bovine Electrolyte Supplement

PRODUCT DESCRIPTION:

The best tool to help calves recover from dehydration resulting from scours, heat stress, shipping stress, in conjunction with veterinary therapy for disease, or any other time re-hydration is warranted.

KEY BENEFITS:

- Restore lost electrolytes and fluids associated with scours, heat stress, or shipping
- Restore optimal energy
- Helps reduce shrink
- Highly palatable formula

DIRECTIONS FOR USE:

FOR DEHYDRATED CALVES OR CALVES WITH DIARRHEA:

Feed 3oz. of this premix per 2 quarts water for calves under 100lbs. body weight, feed 4oz. per 2 quarts water for calves weighing 100-250 lbs.; twice daily as a drench or with a stomach tube.

FOR DAILY FEEDING DURING HEAT STRESS:

Finished mix should supply 2-4 oz. of this premix per 2 quarts water fed between milk feedings or 1-2 oz. of this premix with milk replacer fed twice daily. Provide calf with clean, fresh water.

FOR ADULT CATTLE:

Immediately after calving, mix 10 oz. of this premix with 5 gallons of water and allow cow to drink or administer as a drench. In severe cases of dehydration or sickness requiring rehydration, mix 20 oz. of this premix with 5 gallons of water and allow cow to drink or administer as a drench. Additional water may be used as required for rehydration.

STORAGE RECOMMENDATION:

Store in a cool, dry place.

AVAILABLE SIZES:

25lb Bucket

10lb Bucket
